### Foam-Tite® —

A weatherseal that compresses in application to provide a positive seal in a window or door. This compression allows the window or door to move in its frame and still have a positive seal. When the window sash or door is opened, the Foam-Tite® seal springs back to its original shape to assure a positive seal when the window is closed.

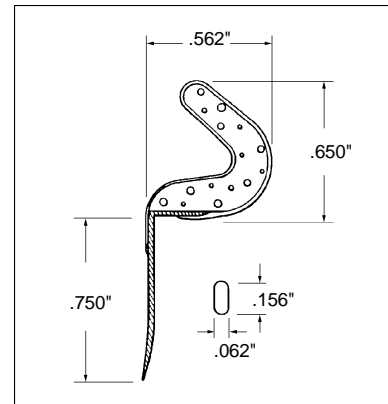

### Foam Weatherstrip for Retrofit/Weatherization Markets.

Here is an easy-to-mount, nail-up version of the highly successful OEM FOAM-Tite® entry door weatherseal.

- Installs quickly and easily with nails and a hammer. Oval holes every four inches permit easy adjustment.
- Seamless Santoprene® elastomeric skin provides easy breakaway, long-life integrity and prevents delaminating.
- Closed cell Santoprene® foam profile resists water absorption, eliminates wicking and has no air pockets.
- Independent tests have shown FOAM-TITE® performs like new under all temperature conditions.
