- Truth Hardware is the largest manufacturer of awning and casement window hardware in North America. They also produce a large variety of sash, double hung and slider window locks.

- Most TRUTH HARDWARE is clearly marked with the TRUTH name stamped or moulded into the various parts.
- Truth products are manufactured to the highest standards of quality and craftsmanship. Truth hardware is not to be confused with the myriad of similar, low-end, products on the market.

#### **Finishes in Stock:**

- Brown (Truth 03 Bronze colour)
- Coppertone
- White
- Other finishes available on special order
- Refer to colour/finish chart in Information Section for Truth Hardware. Note: Colour reproduction approximates actual colour.
- E-GARD hardware, where specified, refers to multi-stage coating process designed to protect both steel and zinc parts from corrosion.
- Please note that each item in the catalogue is available carded or bulk.
- Numbers stamped or cast into Truth products do not denote part numbers. These are component numbers used in their assembly.

#### **Casement and Awning Window Operators:**

- The operators and finishes currently in stock are the most popular, however, a variety of other sizes, styles and finishes are available on special order.

#### **New Folding Crank Handle:**

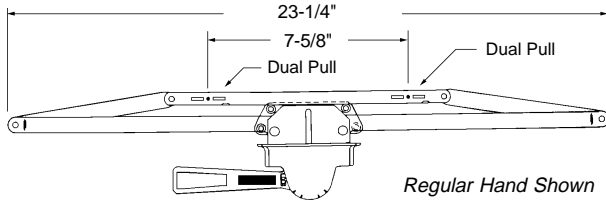

- This product replaces crank or "T" handles. When folded, this crank handle offers a lower profile than a "T" handle. This helps eliminate interference with window coverings (especially vertical and mini-blinds). When extended to the operation position it allows easier operation and less torque when opening window.
- All crank handles fit 5/16" (Truth) spindles only.
- Window locks are available in many styles for various windows. This includes casement, awning, slider and double hung windows. We carry the most popular models but can special order others when required.
- Keepers for window locks are available in a large variety of sizes and shapes. We stock those most commonly used.

#### **Hinges:**

- Standard Duty 4 Bar – Steel construction (zinc plated) with stops. Used on both awning and casement windows – non-handed.
- Awning – Must order by the pair (left and right hand). Other sizes available.
- Concealed Casement – Flat bottom stainless steel track with "Delrin" shoe slide and steel support arms. Supplied with 90° stop device to limit window opening and to protect operator. Many additional sizes available, must order by the pair.
